SKILLS

Front-End: React
React Native
Next.js
Typescript
Javascript
Tailwind

Back-End: REST APIs
Node.js
SQL
PostgreSQL

Design: Figma
Storybook
Responsive-
Design

Other: Jest
Datadog
Sentry
GitHub
GitLab

ABOUT ME

I build fast, ship clean, and leave teams better than I found them. With 7 years of Front-end experience across high-growth startups, I bring both technical depth and collaborative instincts that small teams need to move quickly and efficiently.

WORK EXPERIENCE

Revv

Staff Software Engineer

Oct. '24 - May '26

- Founded and ran a 12-person Front-end Guild spanning engineering and design, driving cross-functional alignment and fostering a collaborative Front-end culture
- Authored a comprehensive Front-end documentation suite covering onboarding, workflows, and team standards, helping the team double in size without sacrificing consistency or velocity
- Led end-to-end development of key product initiatives, partnering with product and design to scope requirements and ship features across a React, Node.js, and TypeScript stack backed by PostgreSQL
- Mentored junior and mid-level engineers through code reviews, 1:1s, and pair programming, accelerating ramp time and supporting a culture of technical growth

Misfits Market

Senior Software Engineer

Jan. '22 - Aug. '24

- Conducted peer code reviews, mentored junior engineers, and served as the primary front-end subject matter expert and technical liaison across teams
- Led multiple concurrent projects, authoring detailed technical specs to define scope, strategy, and implementation plans for new features
- Leveraged Datadog and Sentry to monitor production systems, proactively track errors, and drive rapid resolution of customer-facing issues

Software Engineer

Feb. '21 - Jan. '22

- Designed, tested, and built web and mobile features for a customer account portal and marketplace using React and React Native
- Partnered cross-functionally with product and design teams to scope new features, iterate on existing functionality, and uphold a high bar for quality across all customer-facing deliverables

Searchspring

Feb. '20 - Feb '21

Front-End Engineer

- Integrated search and merchandising software, developed custom functionality to meet unique client requirements, and led mobile and cross-browser testing to ensure consistent performance and reliability before delivery.

Freelance Software Developer

May '19 - June '24

- Designed and developed websites for a diverse portfolio of clients using HTML, CSS, JavaScript, and Adobe XD

VOLUNTEER

Code for Denver, Denver CO

Brigade Co-Organizer

Oct. '20 - Jan. '21

- Participated in leadership meetings to guide direction of the organization, discuss budget and plan events
- Facilitated bi-weekly member meetings of 10-20 people, lead new member onboarding and served as a community resource for questions and support
- Built out external documentation on Notion to improve brigade organization

Software Developer

Jun. '20 - Jan. '21

- Collaborated on projects for Denver based non-profits and local government

EDUCATION

University of North Carolina at Chapel Hill

May '18

B.A. Exercise and Sport Science | Minor Hispanic Studies
